Available Options for the BLD Basic Assistance Harness:

Choose from these options to customize the harness to meet your needs. Must be selected when order is placed, as these options are built into the harness.

Choose Balance Handle style (included)

- **Fixed handle** is permanently mounted and stands upright. This sturdy flexible leather handle offers excellent feedback and communication with your dog. Made to any height, short or tall. Best option if you need to reach for the handle without bending over. It is flexible, so it bends if the dog goes under a table or into a tight space—it is not rigid. (This handle cannot be replaced or adjusted.)
- **Detachable handle** clips onto special d-rings mounted to the harness. It lays down when you let go of the handle. Feels looser than the fixed handle, but this lower-profile option can be changed if you need a different handle size.

Sheepskin padding on belly strap: \$15

Optional padding on rear belly strap is recommended for short coated or sensitive dogs. (All other parts of the harness come standard with sheepskin.)

Guide Handle: \$45 (replaces the standard pull-strap)

Flexible leather handles for leading and pulling. This sturdy handle offers excellent communication and feedback. Angles back for proper leading or momentum contact. Mounts to harness with quick-release buckles, includes Velcro stabilizers. Made to your desired length. (Not easily removable. Not compatible with standard pull-strap.)

Other, please let us know if you need any special accommodations. Some requests require a quote.

Accessories:

Cape/Vest: \$55 standard size, \$59 XL/Giant

***Highly Recommended!**

Specially designed for the BLD harness to hold essentials like ID, money, phone, treats, medicine, cleanup bags, etc. Has 2 pockets, reflective stripes, and Velcro on the top to accommodate the Velcro Patch listed below. **Choose RED or BLUE.**

ID Patches & Badges: various designs and phrases; see website or call for available designs.

Double Patch/Leash badges: \$18-20

3" round 2-sided badges Velcro onto leash, strap, or side of handlebar

Clip on 2-sided badge: \$25

3" round patch clip to attach to a d-ring on harness

Velcro Patch: \$10

Hook Velcro-backed patch for cape, 2.5"x5"

BAH Replacement Parts are available:

This harness has been designed with interchangeable straps for the greatest flexibility; perfect for adapting a harness to fit a new dog or user. (Except fixed balance handles. Rigid brace handle not compatible with this harness.)

NOTE: If you are interested in a harness with a rigid brace handle, please see the information for our Mobility Support Harness.

Harness Measuring Guide

How to measure dog for BLD Mobility Support Harness:

We require specific measurements to make your harness fit perfectly. Please follow the instructions on the following pages and provide measurements when you place the order.

Dog Measuring Diagram:

See Step Two for instructions.

Tips before you measure:

- You may want a friend to help you.
- Watch a video about how to measure on the website!
- The dog and user do NOT have to be together to measure!
- Measure the harness user to determine the correct handle height.
- Please don't guess the handle height, as it will be made to measure for your harness.
- Measure the dog according to the diagram & directions.
- Make each measurement 2 or 3 times for accuracy. Each time may give you different results; this is normal -- don't panic. Average the numbers.
- Be sure you provide the **dog's name, breed and weight** for reference.
- Your harness maker will review your details and will ask if there are any questions.
- Please let us know if there are any special considerations we should note for your order.
- Provide these measurements at the time of your order—you can call us, or email us directly. There is not a form on the website, as we like to be in **personal communication with you!** We will follow up to be sure we get all the info we need to make your harness.
- Please remember that delays in receiving measurements will delay your harness order, as we cannot start work on the harness without these important details.
- Don't panic, we're here to help! Really, don't worry—the straps are adjustable and we'll be sure you get a perfect fit.

Step one: Measure for the handle:

- Have the person who will be using the harness **stand wearing normal shoes, and allow arm to hang naturally at his/her side.** Be sure the person is balanced and comfortable.
- Have the person grasp a pencil in the palm of the hand, as if he/she was holding onto a handle. With the arm relaxed and elbow slightly bent **measure from the pencil to the floor.**
- **This hand measurement minus the dog's height equals the handle height.** See step two for measuring the dog's height. (If your dog is taller than your hand, we will make a 2-3" handle for you.)
- This method is the most accurate. If you require a different handle measurement, please indicate when you order.

Now, measure the dog...

www.boldleaddesigns.com • 303-856-3012 • orders@boldleaddesigns.com

Step two: Measure your dog:

- Measure multiple times for accuracy.
 - Have the dog stand square and balanced.
 - Use a cloth measuring tape or a string. For accurate measurements, keep the measuring tape snug.
 - The withers are where the dog's shoulder blades stick up.
 - Locate the "sweet spot": this is where the dog's back begins, just behind the withers.
 - Please use the diagram on page 3 for reference.
 - Provide dog's **name**, **breed**, and **weight** along with the following:
1. Measure **height** from withers to the floor (lay a book across the shoulders if you like).
 2. Measure the **girth** from the "sweet spot" around the deepest part of the dog's chest.
 3. Measure the **belly** from the "sweet spot," around the soft part of the belly, at a diagonal. Be sure the tape is pulled up snugly BEHIND the dog's rib cage (flanks) and then back to the "sweet spot." (Do not measure the dog's waist.) Boxy dogs may not have a tuck behind the ribcage, just measure the best you can. *(continued on next page)*
 4. Measure the **width** straight across the FRONT of the dog's chest. This is easiest with a regular flat ruler. Sit in front of your dog, and hold the ruler in both hands across the dog's breastbone. Slide your fingers in until you are touching each side of the dog's shoulder bones. (Imagine that your dog is squeezing through a tiny doorway; what is the narrowest space he can squeeze his shoulders through?).

How to order:

You may order **online**, call to place your order by **phone**, or **visit** the workshop in person. You can even **mail** the following order form with a check. Whatever works for you is just fine!

We accept all major credit cards, PayPal, checks, and money orders.

Call or email us with your measurements so we have all the details.

Thank you very much! We look forward to making your new harness.

Confused? Have questions? Don't worry. We're here to help.
